

YAHUAHS RESTORED

LUNAR PHASE CALENDAR 5993 S.C.

A Companion to "Yahuahs Commanded & Restored Lunar-Solar Yearly Calendar 5993s.c."

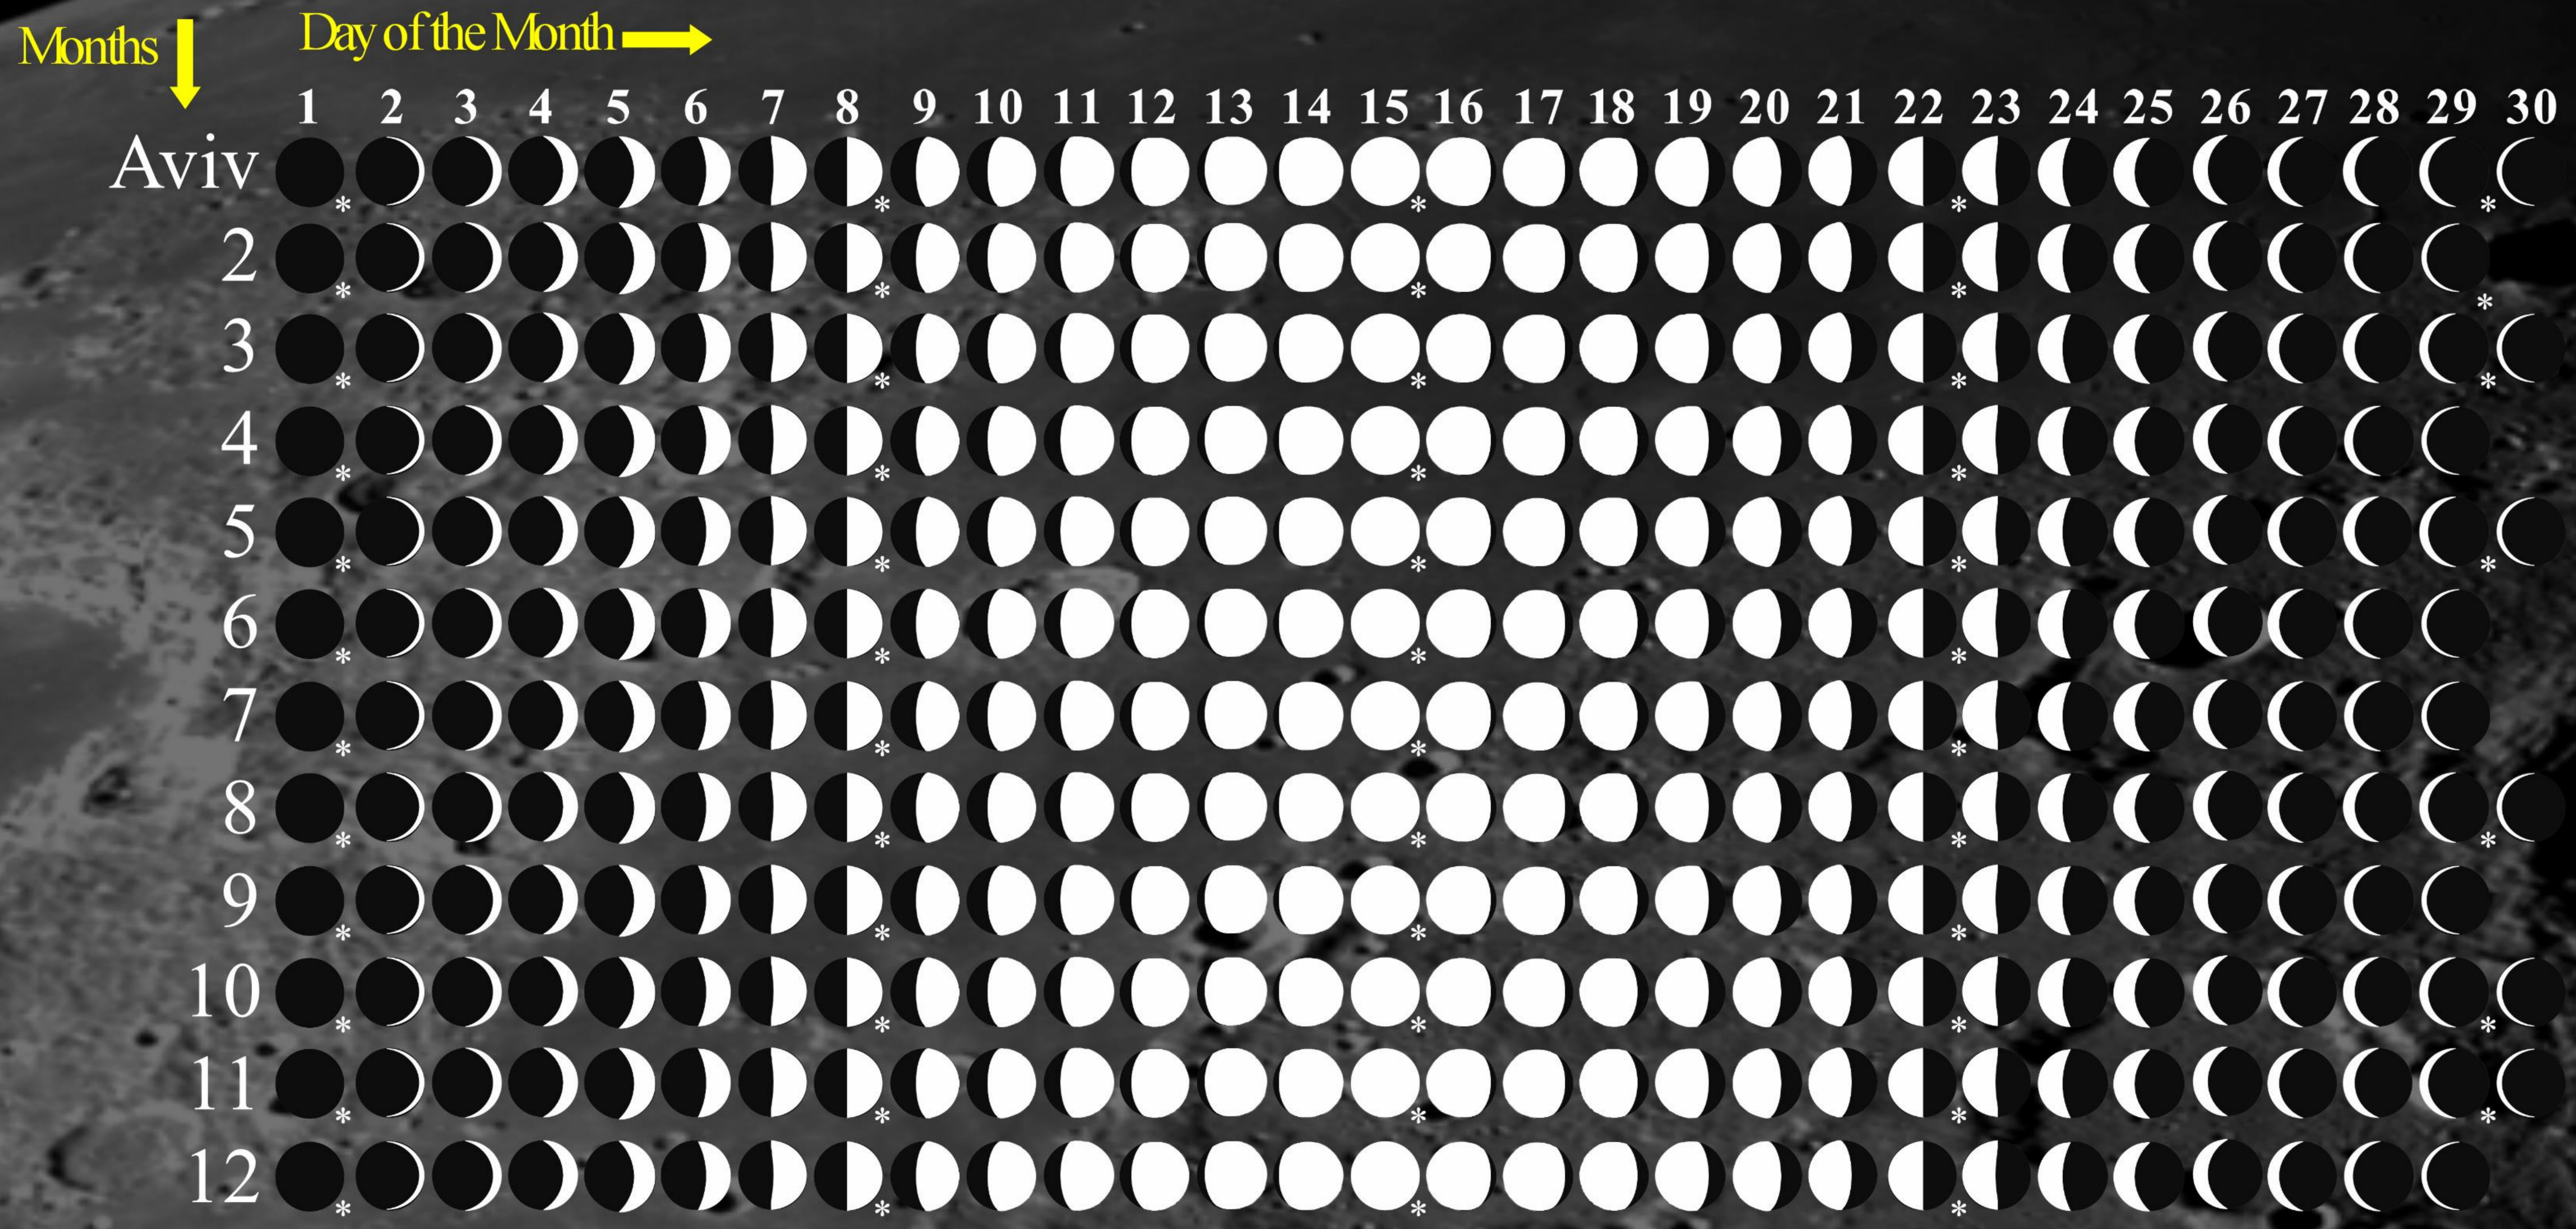

Months and Days Listed Below Show the Lunar Phases for the Lunar-Solar Calendar on Reverse Side

A month begins at sunset after conjunction is complete. On Rosh Chodesh (Day 1) the moon is usually still not visible, as it is too small and traveling too close to the sun to see with the un-aided eye. However the actual moment of conjunction took place sometime the day before. You do not need to see a 'crescent' to begin the month. On the 29th day (*which is the last Shabbat of each month*) if you see the last waning sliver in the east, early in the morning when it is still dark before sunrise, then there is not enough time for the moon to go through and complete conjunction before sunset that day. This speaks to us that there will be a 30th day that month. At the end of the 30th day, at sunset will begin the 1st day of the next month.

Why can it not begin until after sunset? Tehillim (Psalms) 136:8-9 The sun rules the day, the moon rules the night.

Also in Beresheeth (Genesis) 1:5 The evening and the morning were the first day, and many other verses. The day begins at sunset, to sunset.

Note: The "First Quarter", "Full Moon", and "Last Quarter" phases may not fall exactly when Shabbat begins, due to the Lunar 29.5 Day Phase Cycle

**BERESHEETH
(GENESIS)**

1:14
 "AND ELOHIM
 (THE CREATOR)
 SAID, LET
 THERE BE
 LIGHTS IN THE
 FIRMAMENT OF
 THE SHAMAYIM
 (HEAVENS) TO
 DIVIDE THE DAY
 FROM THE
 NIGHT; AND LET
 THEM BE FORE
 SIGNS, MOADIM
 (SEASONS), AND
 FOR DAYS,
 AND YEARS."

Moon Conjunction Times GMT (Universal Time) :			
2011	April 3rd	2:33pm	Oct 26th 7:56pm
	May 3rd	6:51am	Nov 25th 6:10am
	June 1st	9:03pm	Dec. 24th 6:07pm
	July 1st	8:54am	2012 Jan. 23rd 7:40am
	July 30th	6:40pm	Feb 21st 10:35pm
	Aug 28th	3:05am	Mar. 22nd 2:38am
	Sept 27th	11:09am
