

Newsletter for Rosh Chodesh 6th month 6003sc (*pagan calendar: sunset sep 6th ~through~ sunset sep 7th 2021*)

*****YHRIM:** This evening at the going down of the sun, began Rosh Chodesh of the 6th month..... or did it?? **Please Read this newsletter...**

I'm putting the link to this months calendar at the end of this letter... but to be honest I have no way to know for sure if this months projection is correct or not.

Those who have followed us for some years know that starting in pagan 2001, we made projected calendars with each one covering a full year. And they worked just fine for around 14 years. And for a time I made two calendars each year, one covering our time zone here in US, and the other based on GMT.

But then something began to change, at first we just thought the projections were "off" at times. As the moon phases in *some* months were no longer aligning correctly with Yahuahs Shabbats. Which we had not had that problem before.

The last couple years we made the yearly calendar, I had to go back and make corrections and updates during the year. And each year there seemed to be more corrections having to be made.

Until finally the calendar covering 5998sc (2016 - 2017) was the last year we made a yearly calendar, as I had to correct it multiple times during that year. Each time replacing the former version with the "new" updated version. All the while knowing there would be people who didn't see the updated corrections and would continue to follow the original or previous versions.

I even stated at that time that I would no longer be making projected calendars because of the problems we were running into. But as most know, after people sent some emails and etc I ended up changing my mind and began to publish the monthly calendars that we were just making for us here. Just making each calendar month by month as we went, and have done so for nearly 5 years now. But as I marked on those calendars, these were for where we live and may not be correct for where people in other areas/nations live due to the time differences.

However, the "problems" did not stop. They have only happened more and more often. The most obvious way that we or anyone can observe is the full moon, which should always occur at the beginning of the 15th day of the month.

Those who have read/heard the Shabbat and Yahuahs Scriptural Calendar teachings that my Abba Moshe Eliyahu has made, know that he teaches the easiest way to identify when the True Full Moon occurs, which marks the beginning of the 15th day of the month. And that is simply to observe the moon at sunset, when the moon rises. If it is the true full moon, it will rise either right as the sun is setting, or

at least within 20 minutes plus or minus sunset. The time range period was due to the moons 29.5 day cycle.

Further, If it was the day before full moon which is the 14th, then the moon would rise approx 1 hour before sunset. If it is the day after full moon, which would be the 16th, it would rise approx 1 hour after sunset. And this was true for many years, and we observed it every month. As I stated before, full moon was the easiest phase that anyone could watch and see what day it took place on.

But then we began seeing the full moon not occurring on what should have been the beginning of the 15th. Often it was occurring a day "late". We would make a correction to the calendar believing that the projections were wrong. Or it was just our own fault for not observing the moon correctly at the beginning of the month.

However, as time has continued we have watched the full moon "move" more and more often. Sometimes occurring on the 14th, sometimes on the 16th... and then this year it has even went as far as the 17th. Yes, I know the first thought is "you must be wrong, you just didn't start the month at the right time".

But, as we have mentioned a couple times in the last year or so, the next problem is that the full moon was no longer even 7 days between the other two major phases, the first half and last half moon phases. In other words from the first half moon (*aka first "quarter"*) which would occur at the beginning of the 8th day Shabbat, 7 days later should be full moon at the beginning of the 15th. Same can be said from the full moon to the last half (*aka last 'quarter'*) should also be a 7 day period.

But, we have observed that from the first half phase which should occur at sunset beginning of the 8th day Shabbat, there might be 8 days from then until full moon, putting the full moon occurring on the 16th instead of the 15th. Other times the full moon might happen "early", and may be as much as 8 or 9 days between full moon and the last half (last quarter) which should occur on the 22nd. The 7 day period between the major phases was no longer consistent as it had been for the previous 15+ years that we ourselves had been watching and reading the moon in keeping Yahuahs Calendar.

And this continues. But now its not just a month "here" and a month "there" where things like this happens. It has been months back to back... to back. Further, the months ahead, from right now through the 12th month of this year, and even through Abib and into next year. It appears that basically Even the Full Moon will not be consistent from month to month when going by the "normal" calculated projections for the monthly moon cycle and phases. And when trying to continue the "normal" 29 & 30 day months.

The point being, as I first began this post, I no longer know if any of the projected calendars are correct from here forward. The projections are basically useless. The only thing we can do is to watch and read the moon day to day, week to week, and keep Yahuah's Calendar the best we are able while dealing with all the chemtrails and everything else that is being done in these days.

Now... why is this happening?? Well while I have been attempting to make these projected calendars from now until the end of tribulation, which is a little over a year and half. It has been frustrating to say the least. This afternoon I had been working on these calendar for about half the day already, and finally took a break because I wasn't getting anywhere. I had attempted to make calendars for rest of this year and part of next year, but the "problems and issues" were just increasing. So I took a break and sat on our porch for a bit. A thought crossed my mind, what if I made all projected months with 30 days.... So I went back, made a full copy of all the calendars I had been working on and put them into a separate folder and began again. This time ignoring the projections of the last sliver and first sliver timings and locations, and changed each month to have a full 30 days. What did I find? It appears that Yahuah is changing the moon. Or rather He is once again moving the sun which is reflected in the moons phases and timings.

For those who have read the teaching I wrote back about 12 years ago titled "**HIZQIYAHU THE SUN DIAL OF AHAZ & THE 29/30 DAY MONTH**" (*I'll link it at the end for anyone interested*) you know that Yahuah changed the calendar from 30 days every month/360 days a year, to the 29/30 day months which in turn created a 354 day year and a 13th month approx every 3 years. Yahuah gave Hizqiyahu a sign that He would be healed, Yahuah said He would move the *SUN DIAL* either Forward or Backwards, but Stipulated the movement would **Only be 10 Degrees**. As I explain in that teaching the reason for this and how it changed the calendar which can be proven mathematically, and it proves Yahuah changed the calendar from that day all the way to these days now.

Point being by moving the sun, which in turn moved the shadow cast on the sundial, Yahuah changed the relationship between the sun and moon, which changed the days of the months and length of the year.

-->Side note: Why did Yahuah do this in the first place? Because His people, and those who worshipped the sun/satan, both had a 30 day month/360 day year calendar. BUT when Yahuah changed His calendar, it Forced people to choose which they would keep. His Calendar with 29/30 day months and 354 (384) days in a year. Or the sun worship calendar which disconnects the week from the month (as it casts the moon away) and contains 365 days a year, which of course is used the world over today.

We have stated for many years that we believe Yahuah would restore the calendar back to its original 360 day year with 30 days in each and every month. It appears that is what is happening... but not in the way we expected. In King Hizqiyahu's day, Yahuah did this in moments moving the shadow of the sundial backwards 10 degrees right before their eyes. But this time it appears it has been happening slowly over a period of years. Only those who are striving to read the moon and sun to know His calendar have even noticed that something is changing. But like us often just thinking they did something wrong or missed it by a day somehow. But at this point ALL the months are being affected.

As I mentioned earlier, I returned back to the calendars and began remaking all the calendars to have 30 days each month. I went all the way back to this past Abib, though this year, and into next year. To boil it down what I found is this.

Pesach was kept at the correct time on full moon.

The same goes for the '2nd chance" Pesach in the 2nd month.

The 3rd month the full moon was on the 15th, as that evening was the closest day the moon got to rising near sunset. But was longer after sunset than what would be "normal".

In other words, if I had taken the first 5 months of this year, and made them ALL have 30 days, it would push the Full moon away from the 15th.

****BUT**** beginning with the 6th month, I gave each month 30 days. And for the 6th month, 7th month, 8th month, 9th month, 10th month, and 11th month, if ****ALL**** of them Each contained 30 days, the Full Moon is showing to occur at the beginning of the 15th day for **EACH AND EVERY MONTH**.

NOW, does this mean the calendar is "fully restored"? I don't know. If I continued these projections with 30 days in every month, the 12th month of this year the full moon appears to arrive a day early. The same goes for Abib of next year.

BUT this is by projections... ****IF**** Yahuah is moving the sun which in turn will restore the moon back to its full 30 days cycle... then the Projections which continue to hold the moon at having a "29.5 day cycle" will continue to get further and further away from the moons real cycle. We believe this is exactly what is taking place, and why the projections have continually strayed more and more over the past 5 years until now they are getting to the point of being basically useless. **Realize that between the original moons cycle, and what we have all been seeing in these days, is only 12 hours difference stretched out over an entire month. Its not a big flag being waved, but it is enough of a difference that it will cause the phases to move when compared against the days.**

Another interesting point is what was put out in the news just a couple months ago, where "scientists" were stating the moons "*wobble*" affecting the moons so called "*gravitational pull*" in relation to the earth. Early reports stated that this was going to "*suppress flooding from rising sea levels*". But then the entire story flipped with all the news stating that this was going to cause MORE flooding. At the time we didn't think much of it other than they were going to use it as a 'cover story' for all the flooding, storms, and etc that they were creating.

BUT what if they were putting that story out to also explain away the changes taking place to astronomers who actually carefully watch and document the moon. As they are the only other ones that might pick up on these changes. Of course the talmudic elites know all of this, as they know when and how the calendar was changed. But they are all sun worshipers and would never allow the public to know that the 365 day solar only calendar was changing back to the original 360 day calendar, in which the moon and sun are in perfect alignment and harmony.

In any case, to end this email. The moon projections are no longer of any use. Therefore I will not be publishing any of the future calendars as I was intending and have been working on. They simply will not be correct, not even for here where we live and can read the moon. Let alone for people living in nations

all over.

As we've stated for many years, the calendar can vary a day just because of where on earth you dwell. As realize that every single moment of the day, somewhere on earth the sun is setting. And every moment somewhere on earth the sun is also rising. Man calls these "time zones" and the "international dateline". Yahuah simply called it evening and morning which made it equal everywhere. But the variance comes in when comparing them to the pagan calendar.

So what are we going to do here forward... well the same as we have always tried to do. We will go out and read the moon day to day, week to week, and try to keep Yahuahs days as close as we are able. And try to Keep Yahuahs Rosh Chodeshim, Shabbats and moadim at the appropriate times. This is how people are supposed to be reading Yahuahs calendar to begin with. But many still rely *completely* upon a printed calendar or moon phase projections without ever really trying to read the real moon. But as we have said all along, these projected printed calendars were only a tool to help people learn.

Yahuah will help His people, He knows those who are striving. He also knows all the problems created by satan using man, that we face in these last days trying to read the moon and sun. And if He is restoring His calendar by moving the sun, then He knows that this time of transition is also difficult for us to determine some days and that we will have to make corrections as we go. Yahuah is greatly merciful, He knows when we are striving to keep His commandment to keep His Shabbat and moadim to the best of our ability.... But I certainly will be thankful when the calendar is fully restored, as well as when Yahuah restores His priesthood and its once again their job to declare it 😊

With all that said, very Soon there will not be the internet to be able to distribute things like this anyway. Nor even to look up moon phase calendars. With that said, you must learn to read Yahuahs Calendar for yourselves and for where you dwell on earth. You can't be completely reliant upon someone else to tell you when Yahuahs days are, nor are we to be reliant upon others in order to serve Yahuah. You must learn to do it for yourself. But mankind is lazy and will often take the easiest route even if its wrong. So sadly, many will just turn to someone else's calendars instead of learning to read Yahuahs calendar in the sky.

But in the end, we pray that these last 20 years that we have made these calendars, that they have helped people to learn how to read Yahuahs calendar which is proclaimed by the moon and sun. As it is Written how He assigned them this task to declare His calendar to all of His people across all the nations and languages.

This last projected calendar for this the 6th month is linked below and on our website. This will be the last projected and printed calendar we publish.

Now, we will still be publishing anything that Yahuah gives us to put out. Whether it is written or even possibly video teachings, or just information about events taking place. But it won't be long before the internet and etc are taken down. But understand and take to heart, All of Yahuahs people will still be united in Him. And will soon be gathered during or at the end of this time of great tribulation.

We pray for Yahuahs people across the nations,

~Rosh Chodesh Sameach
